Art Unit: 1616

I. Rejection of claim 1 under 35 U.S.C. 103(a) as being obvious over JP '602 is maintained for reason on record and reasons as follows. New claims 10,11,15,17,21,and 23 are added to this rejection. JP '602 teaches the application of alpha ketol fatty acid to flowers. It is inherent that said application to plants (flowers) would promote plant growth, prevent plant dormancy, and enhance plant tolerance.

Claim Objection / Allowable Subject Matter

Claims 12-14,16,18-20,22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the alpha ketol fatty acid having a double bond. The prior art does not teach or suggest the application to plants during or after germination of plant seed. Claims 24-32 are allowable. The prior art does not teach or suggest the instant invention comprising application of C4-24 ketol fatty acids to fungi.
